## 1 Overview table cascades for nutrient recovery and reuse

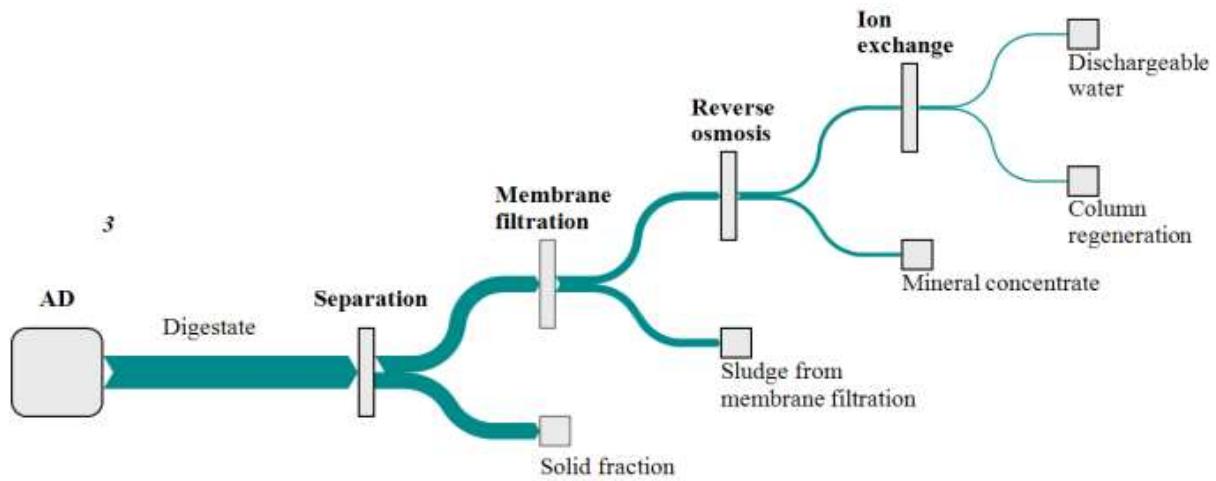

End product	Possible cascades									
Dischargeable water	C3	C4	C5	C6						
Calcium carbonate	C7	C8	C9							
Ammonium water	C10	C11	C21							
Ammonium sulphate	C7	C8	C9	C12	C13	C14				
Phosphorus salts	C15	C17								
Dried phosphorus salts	C16	C18								
Mineral concentrates	C3	C4	C5	C6						
Phosphorus poor products	C15	C17	C16	C18						
Dried products	C19	C20	C21							
Solid fraction	C1	C2								
Liquid fraction	C1	C19								
Liquid fraction from DAF	C2	C20								
Nitrogen poor products	C5	C6	C7	C8	C9	C10	C11	C12	C13	C14

## 2 NRR cascades diagrams per end product

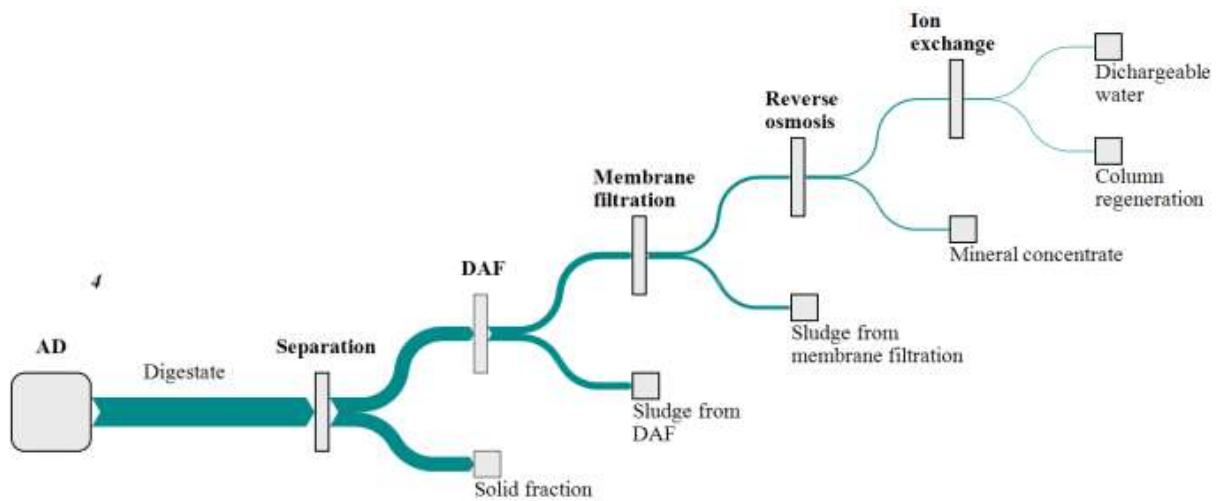

Cascades per product category in this section are presented in the order from simple to more complex cascades to obtain that specific end product. A cascade can deliver more than one end product that could potentially be of interest. One specific end product can often be made by several cascades.
